**Disclaimer:** The product features, specifications, and colors shown in this leaflet are for representation purposes only. Actual product may vary. OPG Mobility reserves the right to change or discontinue any feature, variant, or color without prior notice, as part of continuous product improvement.

\*Top speed can be achieved with single rider and average weight of 70kg, on plain road, tyre pressure and driving pattern etc.

\*\*The true range of the model can fluctuate based on factors such as road conditions, load, riding style, and battery wear over time. These conditions assume a single rider with an average weight of 70kg navigating city roads in Eco mode without carrying extra load while maintaining the recommended tyre pressure.
